Meimaris Communications

- Completely re-designed the old ASP.NET ecommerce by replacing it with an easier to manage CMS (CS-cart)
- Wrote custom plugins and extensions for the company's needs (Back-Office panel, Skrouz integration, custom checkout, order tracking etc.)

Datalab A.U.Th.

- Handled system administration and dev-ops
- Co-designed an interactive data visualization UI with ReactJS and wrote part of the back-end in Flask for the Bot Detective project
<http://bot-detective2.csd.auth.gr>
- Helped in the front-end design of The Ukraine Data Observatory
<https://undo.csd.auth.gr>
- Wrote the web-scraping mechanism used in the Incentive Project using Python
<https://toolkit.incentive-project.eu>
- Designed an interactive dashboard with live updating filtering using ReactJS for the clinapp project
